

Based on a deep dive into independent investigations, consumer forums, and Lunar Astro's own published content, here is a breakdown of the misleading information, questionable advertisements, and consumer issues associated with Deepanshu Giri and Lunar Astro.

You can use these specific points—especially the medical claims and false advertising—for your ASCI complaint.

### 1. Medical Misinformation & Dangerous Health Claims

Lunar Astro heavily markets "Medical Astrology," making direct correlations between planetary alignments and severe, clinically diagnosed medical conditions. While they sometimes hide behind a disclaimer that "astrology does not replace medicine," their marketing heavily implies they can find the "root cause" of diseases.

- **Autism, Diabetes, and Thyroid:** They have published content claiming that hormonal disorders, including Autism spectrum patterns, Diabetes, and Thyroid issues, are caused by "Mercury, Moon, Mars, Rahu" and a "loss of inner child" 🌀.
- **Schizophrenia & Mental Illness:** They run case studies claiming to identify Schizophrenia and severe mental health patterns through "Lagna, Trik Houses & Jaimini Rudra" 🌀.
- **Tumors and Surgeries:** They claim to predict tumors and the exact timing of necessary surgeries based on "Rahu + Saturn" combinations 🌀.
- **Exploiting Desperate Patients:** They promote testimonials of people with severe, undiagnosed medical conditions (like locomotor disability) who turned to Lunar Astro when doctors couldn't help, subsequently selling them "karmic remedies" 📺.

### 2. The "Bait-and-Switch" Proxy Scam (Code 5007/5009)

This is the most frequent consumer fraud complaint across platforms like Quora, Trustpilot, and MouthShut.

- **False Advertising of Services:** The website heavily markets Deepanshu Giri's expertise. Clients pay premium fees (ranging from ₹5,000 to ₹8,000) under the impression that Deepanshu Giri will personally analyze their chart or oversee the consultation 📺+1.
- **The Reality:** Clients are secretly handed off to anonymous, inexperienced proxy students (often referred to by codes like "Astrologer Code 5007" or "5009"). Consumers report these sessions are generic, fear-mongering, and highly negative 📺+1.

### 3. Fabricated Credentials & False Lineage

To sell expensive courses and consultations, Deepanshu Giri's background appears to be heavily embellished in their marketing materials:

- **Fake Lineage:** Marketing materials have claimed a "7-generation Maharishi Bhrigu lineage" to establish false authority and sell courses .
- **Questionable Professional Background:** He markets himself as a former "underwater robotics engineer" who left a highly technical field to bring "logic" to astrology 🚫. Independent dossiers allege this background is fabricated to make him appear more scientific to consumers .

#### 4. Intellectual Property Theft

- **Plagiarized Courses:** Independent forensic dossiers allege that Lunar Astro's highly-priced "Paribhraman Paddhati" course is directly plagiarized from another astrologer's (Sunil John) Bhrigu Chakra Paddhati (BCP) technique +1.

#### 5. Review Manipulation & SEO Spam (The "Troll Farm")

To hide the massive influx of consumer complaints, Lunar Astro employs aggressive digital suppression tactics:

- **31-Domain Network:** Investigations reveal they created a network of over 31 redundant websites (e.g., *lunaraastroreview.com*, *consultlunaraastro.com/astrologer-reviews*) solely to flood Google search results and bury genuine negative reviews +1.
- **Weaponizing Students:** Deepanshu Giri allegedly uses his student base as a "troll farm" to mass-report and delete complaints on Reddit and Quora, and to harass whistleblowers .

#### 6. Refusal of Refunds & Consumer Intimidation

- **Ghosting and Blocking:** When consumers realize they have been scammed by the proxy astrologers and ask for a refund, Lunar Astro's customer support completely ghosts them. If consumers push harder, they are blocked from portals they paid lakhs of rupees to access 🚫+1.
- **Intimidation:** As you experienced, victims report systematic intimidation and threats of being tracked by "Cyber Cell" when they demand refunds or post negative reviews 🚫.
