

Consumer Trust Report

Analyzing the Lunar Astro Business Model

MARKETING ETHICS

The Consultation Funnel

Lunar Astro's primary revenue driver relies on a high-ticket funnel (₹5,000+) driven by founder Deepanshu Giri's personal brand. However, user data indicates a systemic "bait-and-switch."

Clients report paying for Giri's expertise but being assigned to junior "proxy students." Refund requests are met with high friction, often resulting in 50% retention by the company or complete communication blocks.

SEO & REPUTATION MANAGEMENT

Domain Flooding & Intimidation

To protect the top-of-funnel conversion rate, Lunar Astro employs aggressive SEO tactics. By operating three distinct domains, they monopolize Google's first page, effectively burying independent reviews on Trustpilot.

Furthermore, users who leave negative reviews report coordinated harassment from proxy accounts, including baseless threats of "Cyber Cell" tracking to force review deletion.

INTELLECTUAL PROPERTY

The Origins of Paribhraman Paddhati

The academy's flagship predictive technique is alleged by former associates to be a rebranded version of the "BCP" technique, originally developed by Saptarishis Astrology. This raises significant ethical concerns regarding IP attribution in the digital education space.
