

Stripped of Identity: The Sad Reality of Lunar Astro Graduates

BY THE DIGITAL CONSUMER WATCHDOG GROUP

Let us take a moment to look at the Lunar Astro business model not from the perspective of the scammed client, but from the perspective of the exploited student.

Imagine you are a passionate student of astrology. You save up your money, perhaps even taking out a loan, to pay the ₹2 Lakhs required for Deepanshu Giri's advanced courses. You study hard. You pass the exams. You dream of building a name for yourself, helping people, and becoming a respected astrologer in your community.

The Ultimate Dehumanization

But when you graduate and are "honored" with a spot on the Lunar Astro consultation panel, you are handed a devastating condition: **You are no longer allowed to use your name.**

You are stripped of your identity and assigned a number. You become "Code 5007."

This is a deeply concerning, cult-like tactic of dehumanization. By erasing the student's name, the academy ensures that the student can never build their own brand. They can never gather their own loyal clients. They are reduced to

a piece of corporate machinery, generating wealth for the Guru while remaining entirely invisible to the world.

It is a tragic reality. These students paid Lakhs of rupees to find their spiritual calling, only to be turned into anonymous customer service reps for a YouTube celebrity's profit margin.
