

THE ULTIMATE HYPOCRISY: Deepanshu Giri's Failing Health Exposes the Lunar Astro Medical Scam

Document Type: Investigative Exposé & Consumer Warning

Subject: Deepanshu Giri, Lunar Astro, "DNA Astrology", Rituals of Happy Soul

Keywords: Deepanshu Giri health, Lunar Astro scam, Deepanshu Giri diabetes, Rituals of Happy Soul side effects, DNA astrology fraud, Deepanshu Giri fake credentials.

THE CORE CONTRADICTION: A "Healer" Who Cannot Heal Himself

Deepanshu Giri has built a multi-crore empire promising vulnerable, terminally ill, and desperate people that their chronic physical illnesses can be magically cured through expensive astrological remedies. He claims to cure Autism by "reprogramming DNA" and diagnoses Cancer using planetary charts.

But there is one massive, undeniable flaw in his business model: His own failing health.

Consumer advocates and medical professionals point out the ultimate hypocrisy: If his heavily marketed "DNA Astrology" and "Karmic Medical Remedies" actually worked, he would have cured his own biological ailments. Instead, his body remains completely unresponsive to the very methods he sells for lakhs of rupees.

THE PHYSICAL EVIDENCE: The Breakdown of a “Guru”

Deepanshu Giri’s visible physical conditions directly mirror his known metabolic and speech struggles. While his team actively suppresses his medical history, objective observation of his public broadcasts reveals severe contradictions to his teachings:

1. Severe Weight and Metabolic Struggles (Diabetes)

- **The Claim:** Lunar Astro sells courses claiming that specific planetary placements rule the digestive fire (*Jatharagni*) and can be cured by shifting food habits according to “DNA codes.”
- **The Reality:** Giri struggles with noticeable obesity and Type-2 Diabetes. His ongoing personal struggles prove that real chronic diseases are biological conditions requiring modern evidence-based medicine and insulin management—not chanting or gemstones.

2. Neurological and Motor Disconnect (Speech Impediment)

- **The Claim:** In Vedic medical astrology, the tongue and speech are governed by Mercury, and the throat by Venus. Giri claims to know exactly how to “fix” these planetary damages for his clients.
- **The Reality:** He exhibits a noticeable tongue, neck, and stammering speech impediment where he frequently swallows or slurs his words. His remedies completely fail to correct his own structural physical challenges.

3. The Eye and Vision Contradiction

- **The Claim:** Giri teaches that weak vision is caused by an afflicted Sun or Moon and claims that spiritual biohacks—such as “deeply breathing while looking at the Sun”—can alter cellular biology and restore physical health.
- **The Reality:** Viewers have noted Giri’s visibly straining eyesight, heavy puffiness around the eye sockets, and a dependency on corrective

lenses or constant squinting. If staring at the sun could restore ocular health, he would possess perfect vision.

4. Dental Decay and Chronic Halitosis (Bad Breath)

- **The Claim:** Giri charges clients lakhs of rupees to “fix” their Second House (which rules the mouth, teeth, and speech) to improve their wealth and health.
 - **The Reality:** Observers note severely stained, decaying teeth and severe halitosis (chronic bad breath). In medical terms, this pungent mouth odor is a common symptom of Diabetic Ketoacidosis (DKA) or severe acid reflux. His internal organs are struggling to process sugars, leading to chemical imbalances that directly cause foul breath and tooth enamel erosion.
-

THE MANIPULATION STRATEGY: Gaslighting His Followers

How does a man selling “DNA cures” explain away his own rotting teeth, diabetes, and speech disorders? By using calculated psychological tactics to spin his chronic conditions into selling points:

- **The “Karmic Dustbin” Defense:** His inner circle convinces students that Giri is a spiritual sponge. They claim his physical exhaustion, rotting teeth, and failing eyes are a “noble sacrifice” because he is physically absorbing the negative “Karmic blockages” of his students.
 - **The “Satellite Brain” Excuse:** To explain his chronic insomnia, he claims his brain is a “satellite” receiving constant universal “downloads,” transforming a standard medical sleep disorder into an artificial sign of spiritual enlightenment.
 - **The “Hit-and-Trial” Sickness:** When his health visibly declines online, his team argues he is conducting “live experiments” on his own body with volatile planetary energies, tricking followers into believing he is a fearless researcher rather than a man struggling with metabolic health issues.
-

FAKE CREDENTIALS & STOLEN KNOWLEDGE

The deception extends beyond medical claims into his very identity and curriculum:

- **The “Underwater Robotics” Myth:** Giri consistently markets himself as a highly trained, elite “underwater robotics engineer” who left a brilliant technical career. Public background checks reveal this “visionary scientist” backstory was artificially manufactured to give a false sense of logical credibility to his unscientific DNA claims.
 - **Systematic Nakshatra Plagiarism:** Side-by-side textual comparisons prove his multi-lakh courses on Nakshatras rely on plagiarizing out-of-print traditional scriptures and low-cost textbooks.
 - **The NDA Shield:** To prevent students from discovering the stolen content, Lunar Astro forces them to sign aggressive Non-Disclosure Agreements (NDAs). If a student points out the plagiarism, they are threatened with legal action and expelled without a refund.
-

THE REALITY CHECK

Every human being is subject to biological limitations and chronic illnesses. Having diabetes or weight issues is a normal part of human health.

The fraud lies entirely in the hypocrisy.

Deepanshu Giri builds a multi-crore business by promising vulnerable, terminally ill people that their chronic physical illnesses can be magically cured through expensive astrological remedies, while his own body remains completely unresponsive to the very methods he sells.

DO NOT BE FOOLED.

If his remedies cannot even heal his own vocal cords, sleep, or metabolism, **they cannot rewrite your DNA.**
