

FORENSIC CASE STUDY

Consumer Awareness Report

Deconstructive Investigation of Lunar Astro & Deepanshu Giri's Digital
Business & Psychological Exploitation Funnels

IP Theft & Credential Claims

Uncovering the academic discrepancies, lineage claims, and unauthorized rebranding of traditional methodologies inside Lunar Astro.

Methodological Plagiarism Claims

Saptarishis Astrology Rebrand

Audits reveal Deepanshu Giri extracted closely guarded systems taught under Sunil John at **Saptarishis Astrology**. Giri systematically adapted the **Bhrigu Chakra Paddhati (BCP)**, rebranded it as his proprietary "Paribhraman Paddhati," and sold it commercially without attribution.

Vayom Open Conflict

Rishi Rohit Sharma, founder of **Vayom Research**, issued an open letter accusing Giri of lifting proprietary Rahu indicators (nishaniya) from unpublished files. Digital trails proved Giri followed Vayom since 2019. When confronted, Giri admitted the source privately but continued selling it without citation.

| Credential and Lineage Discrepancies

Fabricated Profiles for Scientific Authority

Specialized Title Claims: Giri heavily markets himself as an "Underwater Robotics Engineer" to imbue esoteric practices with scientific credibility.

The Technical Reality: Verification reports show he holds a generic electrical and electronics diploma, and worked as a freelance Remotely Operated Vehicle (ROV) technician on oil platforms.

Ancestral Lineage Gaps: Audits challenge his key marketing pillar of a "7-generation family lineage of astrologers", analyzing it as a business transition targeting psychological vulnerabilities.

| The Proxy "Bait-and-Switch" Funnel

Asymmetric Access Mechanics

Brand Equity Extraction: Lunar Astro commands premium introductory fees ranging from ₹8,000 to ₹10,000+ per session by heavily leveraging the founder's YouTube face and presence.

The Student Code Proxy: Upon payment, clients are blocked from direct interaction with Giri. Instead, consultations are routed to uncredited, anonymous academy students.

Identity Suppression: Student workers are stripped of their names and operate solely behind numbers (e.g., "Code 5007"), leaving consumers with zero professional accountability.

Section 8 Tax Shelter Shield

Financial Routing Arbitrage

Non-Profit Tax Shelter: Multi-crore educational and consultancy inflows are routed away from corporate structures into the **Devguru Hindu Astrology Foundation** (Section 8 Non-profit).

The Asset Leakage Loophole: The non-profit shell leases IP, websites, and data back to private assets owned by Giri's inner circle to extract tax-exempt "royalties."

GST Tax Avoidance: Systemic failures to supply regulatory GST invoices prevent consumers from maintaining legal paper trails to launch formal complaints.

Auditors/Auditing	Forensic Accountants/forensic Accounting
determining whether a company's reported financial position and performance are fairly represented and in accordance with certain accounting standards.	examination of specific records and information to help determine facts related to a suspicion or allegation of fraud.
Audits and forensic investigations are different services that are planned and performed to accomplish unique objectives. While both have a responsibility to detect fraud, the degree of that responsibility is substantially different.	
help provide confidence in the world's financial system by performing audits of financial statements to provide assurance that company management is presenting a "true and fair" view of a company's financial position and performance.	assist entities in conducting an investigation by providing their expertise, from the initial allegation or suspicion of fraud to resolution, whether the end result is restitution, litigation, an insurance claim, referral to a law enforcement agency or proof that no fraud occurred.
express an opinion on whether the financial statements are presented fairly, in all material respects, in accordance with an applicable financial reporting framework.	The forensic accountant's role in litigation is to report on legally obtained evidence objectively, succinctly, and with a sufficiently explained foundation. For matters in litigation, there must be evidence provided to the trier of fact – beyond a reasonable doubt in criminal cases, and by a preponderance of the evidence in civil cases.
An auditor owes primary allegiance to the investing public, and the objective is general in nature..	A forensic accountant is not concerned with reaching a general opinion on the financial statements as a whole; his or her objective is more specific in nature as defined by the scope of services in the engagement letter, and the work is typically directed through counsel and, therefore, privileged and confidential
Auditing has a program and plan from the start that usually doesn't take any turns.	Forensic accounting starts with a plan that at any point in the investigation may require a pivot and new direction based on findings.
The auditor attests to the assertions of other parties. In an attest service, the practitioner expresses a conclusion about the reliability of a written assertion that is the responsibility of another party – such as company management.	In a forensic investigation, the practitioner develops findings, conclusions, and recommendations based on the evidence discovered during a forensic investigation.
auditor must adhere to applicable auditing standards and include prescribed engagement terms.	A forensic accountant is typically hired by counsel on behalf of a client to maintain the privilege of communications, and adheres to less restrictive engagement term standards as those by an auditor.
Audits are planned periodically and on a recurring basis.	Forensic investigations are unforeseen, reactive and nonrecurring.
The allegation or suspicion of fraud is not the basis of an audit.	A forensic investigation begins with an allegation or suspicion of fraud.
An audit is an obligated engagement for which a company must hire an auditor to provide an opinion on the truthfulness and fairness of its financial statements.	Forensic investigations are typically conducted voluntarily because a company has a suspicion or allegation of fraud.
An audit is performed by auditors who are CPAs.	A forensic investigation is typically performed by a multidiscipline team of experts that often includes CPAs.
The appointment of an auditor is made by the shareholders of the company.	forensic accountant is appointed by the owners/management, counsel or a third party.

Reputation Laundering Framework

31-Domain Link Farm

Preemptively registers auxiliary sites (e.g., DeepanshuGiriReviews.com) stuffed with search terms like "Scam" or "Refund" to trap search traffic within company-controlled blogs.

Coordinated Flagging

Mobilizes student networks to mass-report negative reviews, whistleblower pages, and decentralized communities (e.g., Quora, YouTube) to trigger automated takedowns.

Title Hijacking

Re-registers web subdirectories with the exact titles of viral critical reviews to display false positive text and redirect search algorithms away from genuine grievances.

| Extreme Labor Arbitrage Economics

94%

Corporate Profit Margin

De-individuation & Sweatshop Metrics

Inbound Capital Conversion: The platform charges premium consultations at high introductory gates (₹8,000+), extracting maximum brand equity.

Labor Extraction: The actual chart calculations and sessions are delegated to trained student interns inside the "Acharya Factory."

The Compensation Split: While the student proxy performs 100% of the counseling labor for a flat ₹500 fee, the parent platform retains ₹7,500+ solely for lead placement.

| Unregulated Clinical Pathology Claims

-  **Autism "Cure" Proclamations:** Claimed across media handles that neurodevelopmental frameworks like Autism Spectrum Disorder (ASD) can be permanently reversed through planetary sound loops and herbal alignments.
-  **Cancer Diagnostics & Avoidance:** Claimed Rahu in the 6th house guarantees terminal cancer. Advised clients to avoid expensive clinical scans, steering them to high-markup esoteric remediations.
-  **Proactive Content Purging:** Mass-deleted historical diagnostic videos and health catalogs upon facing legal warnings to prevent tracking by state Cyber Crime Cells.
-  **Karmic Threat Isolation:** Uses psychological threats ("Ancestral curses on kids") to enforce quiet compliance, warning students that exiting the network will trigger severe financial ruin.

Educational Pipeline Price Structure

Certification Course Level	Pricing Range (INR)	Rhetorical Promise	Actual Instructional Delivery
Foundation Astrology Level	₹25,960 - ₹30,900	"Direct intuitive secrets"	Pre-recorded, unedited 2-3 hour videos. Zero synchronous support.
Predictive Astrology (Part 1)	₹37,170 - ₹44,000	"Absolute event algorithms"	Asynchronous files. Support channels are completely blocked.
Two-Year Academy Diploma	₹1,35,000 - ₹1,49,500	"Certified professional launch"	Accreditation carries zero legal or academic recognition.
Bhrigu Vastu Advanced Certification	₹1,50,000 - ₹2,00,000+	"Map homes using horoscopes"	Bypasses structural blueprint scales via standard cold-reading tricks.

Predictive Systems Empirical Analysis

Geopolitical & timeline audits show 90%+ failure rates. Traditional Vedic astrology dictates that events cannot manifest via transits alone. Lunar Astro's shortcut bypasses the Dasha system entirely, leading to systemic failures disguised as "test of devotion".

Statutory Channels for Consumer Redressal

National Consumer Helpline

Administered directly by the Ministry of Consumer Affairs, Government of India. This pre-litigation portal maintains unalterable legal history where private corporations cannot remove complaints.

Filing Protocol: Call statutory toll-free number **1915** or lodge reports online at the official NCH portal.

Cyber Crime & E-Daakhil

E-Daakhil Portal: File formal cases directly with Consumer Disputes Commissions to claim refunds and damages without expensive lawyers.

Cyber Crime Portal: Securely lodge complaints against cyber harassment, doxxing, extortion, or threats of curses using metadata evidence.
