I took consultation in January 2024 regarding business. None of the remedies worked for me. Consulting astrologer was little rude. Even astrologer suggested me to cut down my rates if I want to grow my business. I am a well experienced Advertising and Design professional, I also know that if I will provide my services on cheaper rates I will be full of business. Only one prediction came true that from mid 2025 to mid 2026 will be very difficult period for my business. Astrologer wanted me to work with Podcasters and YouTubers as per my birth chart. For Podcasters astrologer used word "Baba Log". I got confused about "Baba Log", so he explained to me "People who come on YouTube and give opinion on various subjects".

To be honest, overall it's a type of fraud, I took consultation with very high hope but it was just a wastage of money I gave the realistic and honest comment on YouTube channel and they deleted that comment. They only show you the good comments. Don't go for such consultation as they are charging such a high fee for nothing. Whatever is on YT is just for selling the course. Not able to predict anything correctly in my case, however a very small village astrologer predicted 100% exact that happened in future and that too for free. So they can't say my time of birth was wrong as someone else predicted correctly from same kundali. Very soon you will be exposed

I wasn't happy with the consultation. The consultant did not try to understand my perspective although claiming it's personalised reading. He was not able to predict

my past events as well . He told me certain things which I said that could not be possible . But instead of giving time to understand why it could he was trying to forced his own biased into it. Certain things about my profession he couldn't say because obviously I guess they don't know the extent of field . Plus the where I should be working according to him did not match my past or even present. I am only giving one start because it's not worth price as claimed as personal or else it was just 2 star
REPLY TO THE RESPOND: If I talk politely that does not mean I agreed with someone. And secondly releasing anything publicly you show how much you are protecting your client's confidentiality. But trying to protect your own identity. This is clearly how you blackmail someone to take down review so you want to realise their information publicly. And again a reason why people should not approach you. If you need to improve something improve your ethics and protect client confidentiality . I am glad I did not approach again for anything else . Thank you !!

I have taken 4 consultations from Lunar Astro around same time in 2024 for my family members. All consultations were disappointing, astrologers focus only on remedies , predictions are below average.

This rating is only for the consultation i took, and not for the entire channel. I respect Lunar Astro and Deepanshu Sir. I took consultation last night from 5009LA.

Unfortunately, the experience was not satisfactory. I took Shakti consultation where my expectations were really high. Sir Deepanshu has so much wisdom, and he is Guru. Astrologer was not that knowledgeable like I expected from this prestigious institution. He was same as any other astrologer on any astro app. There should be a difference when you are a disciple of such a great person. Also paid good amount of money but all you get remedies that are available on internet for free. My only concern is that people come with hope and high expectations. Kindly respect it.

I consulted with code 5003 on Saturday, March 8, 2025, and spent ₹8,000 (after a 10% discount). However, the results were far from what I expected. I was initially drawn to 5003 based on numerous positive reviews, which led me to believe I would receive genuine guidance. Unfortunately, my experience suggests that many of these reviews might be misleading. At the end of the session, she also shared the Google review link, which makes me feel that some people might have left good reviews under a sense of pressure. Throughout the consultation, I struggled to understand her as she spoke hurriedly, often requiring me to ask her to repeat herself. She didn't provide clear insights about the future and mainly suggested remedies without proper explanations. This was my first time investing such a significant amount in seeking a solution for my sister's problems, and I had high hopes. However, after this experience, I feel that my money has been completely wasted. Spending such a large amount for a solution that didn't deliver any real value is disappointing. I was inspired by Deepanshu Giri Ji's interviews and videos, which led me to this platform, but this consultation did not meet my expectations at all. Based on my experience, I wouldn't recommend spending a large amount of money on these platforms.

5003 consultation gone wrong. The way the consultant tried to stuff her words by saying this is wrong that is right was absurd. Moreover I am a student of lunar astro myself. The consultant lacks understanding of clients, patience and is below par. I would ask Deepanshu Sir to teach them yoga, meditation and then only keep them for consultation. The language as Deepanshu Sir says is the key. Highly disappointed by her. I wanted to ask the question and she didn't listen and disconnected the phone. What's the point of taking consultation when the client is not heard. I was dissatisfied but only due to Deepanshu Sir I kept quite. But today I would say this again Mr Deepanshu giri, these consultants will prove a blot on your image. Mark my words. Har Har Mahadev 🙏🙏🙏 Ps: To the folks out there, this was just to let you know the truth, having a good, honest, and upright teacher like Deepnashuji(I have zero issues with him) doesn't guarantee that others(team) will be useful and helpful to you 7th&8th lord in 5th house with Saturn in scorpio in it perfectly justifies it. Invest your money and time wisely. Moreover it's about emotions. Check three times and then invest money, time and emotions. I was hand to mouth when I took the consultation as my family was worried for me. So I took past life pending karma reading and didn't get it. Sometimes some people don't have money and due to the purity of guru they trust the consultants and when the

consultants don't justify the soul of the person they are already cursed; not just by the clients who seek light but also by the person who employed them. Forget about me as an individual, it was for a soul. Myself being a teacher, I have always cared about the after service, just to see that no money is earned which hasn't come after due hardwork as my guru Deepnashuji says 🙏🙏 in one of the courses. I know sometime truth may seem unwanted but it's necessary to improve. I have no ill-feelings that my doubts couldn't be answered. I live life with full detachment 😌 Peace to all those who read this message. The soul travels, the you and I die at the death bed. One must be conscious. Gitaji says, the greatest sin is to break someone's trust. Moreover folks, I love Deepnashuji without seeking any reciprocal affection! The love affair should always be from one side-it turns your emotions into devotion- for the fruits only a soul can enjoy 🙏 and know Har Har Mahadev 🙏🙏🙏

I had taken a consultation almost two years ago during a very difficult phase of my life, and I paid a high consultation fee hoping for guidance. Unfortunately, the experience was extremely disappointing. Not a single prediction made during the session came true. Even the descriptions about my past and present were far from accurate. When I questioned this, I was told that my birth details must be wrong, which was not the case—my details were absolutely correct. I was also told that my chart had been discussed with the Deepanshu sir himself, which makes it even more surprising that not one prediction aligned with reality. I even wrote a mail later to share my dissatisfaction, but apart from receiving promotional messages about products and services, there was no genuine response. I say this with respect, but also with disappointment: for the amount charged and the trust placed, the consultation did not provide value or clarity.

With all due respect, I took 2 consultations with Lunar Astro mainly for health. Both astrologers have given different lagna, different remedies, different Rudraksha and different gemstones to wear. The BTR was also different. The situation is still the same. God ! How many consultants does it take to crack a chart ? The only suggestion I have received every time is to go for another consultation in case of any confusion. Infact before the 2 consultations I clearly communicated all my issues in

detail on mail and call. But still the consultants could not give a correct BTR. Infact one astrologer was not able to comprehend the aspects correctly ! Even the predictions were not to the point. Now, LA team would suggest to go and book a Technical Consultation. I have great regard for DG Sir but somehow it didn't work for me. Remember : Mis-guidance from the knowledgeable is a bigger curse than the curse of an illiterate.

I recently had a disappointing experience with Lunar Astro and felt compelled to share my thoughts. The predictions I received were far from accurate or insightful. Instead of providing any real guidance, the predictions were vague and general, offering little more than what you could find from a basic horoscope. It felt like a copy-paste job with no real effort put into tailoring the advice to my specific situation. Additionally, the overall experience was quite discouraging. Rather than offering helpful insights, Lunar Astro seemed to focus more on demotivating statements, leaving me with a sense of doubt and uncertainty. There was no professional approach to the consultation, and the interaction felt rushed and impersonal. It was clear that the goal was more about pushing for additional services or consultations, rather than genuinely helping me. To make matters worse, the cost was exorbitant, especially considering the lack of value provided. I expected much more for the price I paid, but unfortunately, it was a waste of time and money. I would not recommend Lunar Astro to anyone looking for accurate, professional, and constructive astrological advice.

I paid 5100 for a consultation on one question by one of the lunar Astro Pandits. He predicted three big life changes on my career front - none of them came true. 1. Transit/ movement to another city for job - didn't happen as I'm still in my home city 2. It's a big reset on my career front- none of that happened- I got a job in the same company I was working for. 3. He also predicted that I will not continue in my govt job- I'm still in the same govt dept on internal job placement. What a waste of my hard earned money when I was about to lose my job and was looking for a right consult. He spoke heaps negative in the coming months and scared us on the future. None of that happened. Such a terrible experience and loss of money

Deepanshu, it seem your employees and partners have really gone mad on a simple criticism and review as per my experience, look at the kind of words your team use to reply. they are astrologers and not rowdies. Hope you have gone through the audio transcript your team is mentioning! I also assume you are not posting replies

yourself. If yes, God save you and your team! such replies were not expected from a team of a person with a stature like yours. this is true for all the negative comments for your business listing! something is really wrong you need to address. reply to your team- please share full drive link of the 3 minutes discussion, and let all your customer know how you are doing consultation, and cant take simple question when you announce lagna change. I have enough proofs' written and recorded post and pre the the so mentioned 3 minutes discussion with your astrologer. You team mentioned - 5055 have two years of experience and 2 years' of study time; but he is not able to take simple questions while creating anxiety because of lagan change. initial reivew - the consultation quality have downgraded. most of learned astrologer have left, more over thy have charged the methodology too - they claimed earlier on website and videos that Deepanshu himself discuss the client chart with assigned astrologers. Now they just assign astrologer randomly who is less experienced (mere of 2 years of experience and 2 yrs of study- they call best and astrologer ! that too to do a major consultation like BTR) Astrologers (5055) are arrogant can't take question and positive criticism (basically due to less knowledge it seems), service team is more pathetic they will start teaching about astrology methodology and down mean customers rather than rectifications. Deepanshu is almost missing from the picture, who so ever is going for consultation with them, note that he will not even see horoscope any more. till 2023 this process was different. they now just allocate charts to astrologer (5063) at the time of meeting, which end up either in unsatisfactory consultation or rescheduling. Validation methodology for BTR has deteriorated. And if asked astrologer will forcefully change birth time without proper validation. remedies are incomplete and further questions after consultation are not entertained. focus of Deepanshu seems now shifted to class and selling books. Note creating a video with generic analysis is different from real consultation. Avoid going to them after seeing youtube videos. It seems the astrologer associated with him are his weak students and leftover, and focus has shifted to just give spot consultation without any internal analysis with Deepanshu. There are better options available at a given price. more over the astrologers are in disguise with a number only. Relay bad operation and service team. N.B. Keep revisiting the comment to know detail EXPERINCE AND REVIEW or DM

I had 2 consultations done. One in 2022 and second one just recently. Very disappointed with the approach. Predictions were wrong and when I pointed out I was told I might be running a bad dasha at which I couldn't help myself but laugh. So technically if predictions come true, credit goes to the astrologer but if not then it's the fault of your dasha. Moral of story - don't approach them if you are going through a bad phase in life. And eventually it appears as if it's all about business and money and no responsibility what so ever.

I had a consultation today and, even with my limited knowledge gained from your YouTube channel (Lunaraastro), I found it lacking in detail. For me, it was a waste of money. The astrologers who consulted my chart lacked confidence in their interpretations. Deepanshu Sir and the Lunaraastro team, if you are reading this, please improve the quality of the astrologers you recommend. Based on your YouTube content, I can see you possess great knowledge, but the astrologers on your website do not reflect the same standard.

I have been following Lunar Astro for quite some years. Deepanshu sir's YouTube videos are always accurate and I was able to predict a lot many things in my life with his guidance, since I too am keen on astrology and know it well enough at least till intermediate level. However when I got my one hour consultation the astrologer assigned to me gave me all wrong predictions, even after I provided her with more than enough information. It was very misleading and had no value for money. Certain mantras that she told me to recite I did and I'm sure that did help but all in all the reading was not up to the standard/knowledge of Deepanshu Giri. I waited all these months to see what predictions would come out to be right and none of them did. For example she predicted about my marriage, even though I was in a relationship with a foreigner she said there's no chance of marrying a foreigner (Rahu 7th) which of course was not true. I did marry him. In my personal opinion the consultant astrologer assigned to me is not someone I would recommend.

Rating is for the bad service not the astrologers skills or knowledge. The session with the astrologer was okaish, I don't know the astrologer code bcz it was never shared. There was a some issue during the meeting from the astrologer side but it took almost 1 month to reschedule remaining time. And I recieved my recording after reminding them repeatedly to which for some reason I couldn't actually watch bcz it is valid for just one day. I I checked my email few days later bcz of the busy schedule and I couldn't even see the recording for what I paid a hefty sum. Really bad experience. Doesn't feel like worth spending. This much amount for such a service. i wanted to book another session but just bcz of the experience that I had, I will not. Note: There are better astrologers out there with good services, I tried some other astrologer and it was awesome.

Hello, I had a reading by an astrologer from Lunar and it did not resonate with me at all. I have been studying jyotish for 2 years and of course it does not make me an expert but I am intermediate with much knowledge on the subject. The reading he gave about my spouse was not like any reading i had or my own interpretation from my chart. The explanation was super short and lacked any depth. If I hadn't asked any questions the reading would have been about 5 minutes when it was supposed to be 25 mins. I had to ask for more details and he just repeated what he had already stated. I was extremely disappointed. It was a complete waste of my time. EDIT: In response to the businesses' reply: 25 minutes is plenty of time to give a thorough answer to my 1 question about spouse. I can read a chart and give a detailed answer in 15 minutes. If it takes longer than 15 minutes to explain the characteristics of the spouse then the astrologer is incompetent. I did not confirm anything. I corrected it based on my own knowledge. I also felt the astrologer was fishing for me to verify if what he said was what I knew. He kept saying is there someone in your life who matches this description. I said sort of but not really. Also, like I stated he said a few lines of the description and waited for me to say yes or no. Is that how a consultation should go? He needs me to confirm his expertise??? LOL. It was

probably one of the worst readings I have ever had, I tried to be polite and professional but it was just God awful reading it did not describe my spouse at all. I have intermediate knowledge and have some great readings and this one did NOT resonate with my chart as well, For example, my 7th lord is saturn and is conjunct mercury and sun. I asked what will my spouse be like, he stated "he will b like saturn, sun and mercury." ARE YOU KIDDING ME? A 5 year old could have told me that. It was the worst. I cringed listening. Anyway, I was highly disappointed especially waiting over a month for this kindergarten level reading.

They don't share soft copy of the consultation calls. Not reachable on phones; also recording of call is not allowed to the customers. At a given price every one in industry is sharing recorded call for future reference. It is total waste to spend exorbitant money with them. They keep their astro staff's name etc. information so disguise that client is not even told the name of astrologers. The question after consultation go unheard as there is no way to reach the consultant astrologer. Emails are poorly managed. If customer has doubts on method remedies performance such emails goes usually un-answered. GST Bills are missing.

Dear Deepanshu ji, I have consulted with one of your students through Lunar Astro and also followed the remedies specified by him (planting 2 amla trees on Friday) but till date I haven't seen anything positive happening. I have been going through a seriously bad phase since last couple of years that have hit me from all corners -

Financially, Mentally as well as consistent Health issues. Prior to this period also, I have suffered major setbacks but these couple of years have been the worst time of my life with revival yet to start. After trying out different options, I haven't experienced any positive outcome and therefore lost faith and interest in these astrological predictions and remedies. Hope you understand why I have not given any stars in the ratings.

They are fraud. I took two consultation from them on different topic from two different astrologers.. only one question was common. And they both answered completely opposite. Like I asked something for which one answered don't even try there's no combination for that ever. And the other one said it is inevitable, you'll have to do it eventually. Also I raised the issue through call who asked me to send an email. I'm continuously mailing them for more than 2 weeks now and no response . Don't waste your hard earned money. They are fraud. They make general statements which are applicable to majority of people. If you are looking for answers, don't consult them. If you have " papa k paisa" to udaao..

I reached out to this consultancy in August 2024 and had a session with consultant 5015. The predictions regarding my past were about 50% accurate, the future predictions for my career (between November 2024 - February 2025) have not materialized so far. I followed 4 out of 5 suggested remedies, but one was financially difficult to perform. Despite this, I truly appreciate the time and effort that went into the consultation. If someone from the team could guide me further to rectify or

reassess the situation, I would be grateful. Looking forward to continued guidance from such a knowledgeable source.

Since I have been following Dipanshu sir for long I had great expectations and also because some of my friends got great consultation. But mine was with code 5031 and wasn't great...its was too brief, not detailed and covered 2 word answers to all my questions. I felt cheated and looted as it's a lot of money - these consultations are way more expensive than a common astrologer ...didn't meet my expectations at all. I also raised it with them through customer support , but there was no resolution provided. I would love to take the consultation directly from Dipanshu sir but there is no such option on the site! Thanks anyways:

In January 2025 I had a consultation with 5009,.the astrologer was very patient and polite also predicted some past life events successfully but the main reason I Booked the consultation was regarding my career in which he told that I am gonna have a laid off or change in job till August 2025 and it didn't happen. This consultation wasn't upto my expectations as their prediction haunted me for my job loss or change which never happened.

I tried Lunar Astro on recommendation of a friend of mine. My thoughts are as below
1. The session was of 45 mins, well conducted. The astrologer was on time. 2. The initial points on past life were accurate. 3. However the predictions made based on the chart was quite opposite of what a trusted astrologer had told me a while ago(This is an astrologer I have been to previously a few times, and the things told, did come true). When I pointed this out, the astrologer said that every astrologer has their own interpretation of the birth charts (not sure what that means) 4. Some of the remedies suggested were practical, but the rest was quite impractical 5. I felt their should have been a format of response for the questions asked, i felt like I had to do the questioning, rather than astrologer being forth right with the information Overall not a great experience, but I am sure this might have worked out well for others.

Learning from Deepanshu Giri is blessing. But, consultation is done by some group of students, and it is totally disappointing. The kind of predictions and knowledge Deepanshu ji shares is not there in the consultations, given by his team. So it is better to learn and apply yourself, instead of consulting with Lunar Astro.

Waste of time and money. Consulted 04.04.2024 The person spoke like a novice, hesitant, unprepared, and had nothing concrete to predict. No specific answer to any query only unnecessary talk about past events and planetary positions. Too much

time spent on remedies. All claims of home work, in depth study and analysis of kundali etc are misleading.

spending 6k to know about your carrer and u got still confussed from the astrologer advice is useless. firstly i got session with someone who was not at all upto the mark and then after the reschedule session it was also the same. so i am not at all satisfied .

I had contacted Deepanjan ji 5 months back . He briefed me about my general characteristics nothing in particular. He couldn't give direct answers to my queries . Regarding past life also, he just finished in one line saying nothing was prominent but I have 3 retro planets among which 2 are combusted. While talking about career he was wrong by one year (late) . Since I have huge respect for Deepanshu sir and other astrologers , I hadn't written the feedback till now as it was going to be negative . Sorry Deepanjan ji for being frank. I have been following Deepanshu sir's videos and posts on blog. I am following the surya arghya remedy suggested by you for career, thanks sir 😊

Not sure if my rating is actually right or not. But I got to know about Lunar Astro after I was laid off from work in late 2024, I had my first consultation with 5001 in early Jan 2025 wherein my issue, was stated to be resolved or I will have a job by Aug 25 but that didn't happen, also I continued doing the remedies, a lot happened in the midst, had another consultation by 5015, where a similar prediction was given but the breakthrough only came after my consultation with 5009 happened, he told me that in the current year 2026 I will land a job which I did. I also got multiple offers at the end of the day but, I still feel that if they could provide something that I could do for the rest of my life. The team is also very helpful

5054- I wish the consultation was more structured and the past artifacts had been discussed and talked about before proceeding to the future predictions. The consultants should do some homework on the chart before starting the consultation. The predictions were very abstract in nature and not detailed. Pls note that the clients don't know the signification of a planet going in certain house and other technicalities. I'm sorry but it was not as per expectation. I wish the consultant all the best 🙌. 2.5/5 stars

I was expecting little more from the consultation. Past event prediction was not spot on and hence does not give me the confidence on future events.
