Executive Summary: The Faces Behind the Harassment

The Lunar Astro Vedic Academy operates a highly coordinated digital enforcement network designed to silence whistleblowers, intimidate dissatisfied consumers, and protect its lucrative proxy-astrologer business model. This network utilizes severe cyberbullying tactics, including doxxing, mass reporting, and the weaponization of minor children's photographs via pages like "Lunar Astro Memes."

This intelligence dossier strips away the anonymity of this troll farm. Compiled from multi-jurisdictional cybercrime filings, community registries, and public exposure logs, this document serves as a formal roster of the individuals executing these illegal campaigns.

Tier 1: Command & Control

The operations of the cyber syndicate are not organic; they are directed from the highest level of the organization to protect its financial interests.

DEEPANSHU GIRI

Founder & Primary Director, Lunar Astro Vedic Academy

Function: Directs the overarching operational strategy and provides the public "bait" marketing. Evidence logs and law enforcement dossiers have directly linked Giri to issuing explicit ultimatums to whistleblowers (e.g., *"I will make your life hell"*) immediately prior to the activation of the troll farm and character assassination campaigns.

Tier 2: Core Enforcers & Intelligence Leads

These individuals manage the logistics, deploy the proxy accounts, and execute the targeted harassment campaigns against victims and their families.

MANIT VERMA (ALIAS: ASTROLOGER CODE 5054)

"Top Fan" & Lead Enforcer

Function: Operates internally under the ID Code 5054. Verma is explicitly identified in cybercrime dossiers as the primary operator behind retaliatory reputation-laundering campaigns. He directs defamation campaigns, counter-attacks consumer reviews, and weaponizes social media proxy pages (such as "Lunar Astro Memes") to post sensitive data and silence critics.

DEEPTANU DEV

Core Digital Operations & Intelligence Lead

Function: Named in multi-jurisdictional cybercrime filings as a key technical coordinator. Dev manages the digital logistics, backend tracking of target profiles, and the extraction of private client data used for doxxing and intimidation.

Tier 3: Core Troll Farm & Proxy Operatives

The following individuals have been explicitly named in active cyber cell complaints and tracking logs for participating in coordinated mass-reporting, doxxing, and algorithmic harassment campaigns on behalf of Lunar Astro:

Operative Name	Documented Activities
Ansh Singh	Coordinated mass reporting, algorithmic censorship, and targeted harassment.
Satish Kumar	Execution of digital intimidation and suppression of negative consumer reviews.
Jitin Malik	Participation in private coordination groups to issue false copyright strikes.
Kammal Waddhwa	Amplification of defamatory content and proxy account management.

Tier 4: Coordinated Campaign Members

This network of loyalists and students is activated to flood comment sections, mass-tag victims' employers and families, and create an overwhelming atmosphere of psychological terror. They are documented participants in the cyberbullying syndicate:

- **Yogita Chaudhary**
- **Sandhya Singh**
- **Swati V Jain**
- **Niharika Sharma Banduni**
- **Shivi Asthana**
- **Mayuri Agarwal**

- **Shivani Gupta Agarwal**
- **Parveen Siddique**
- **Sunaina Khandelwal**
- **Nidhi Yadav**

The Modus Operandi: Why These Names Matter

The individuals listed in this dossier are not merely expressing opinions; they are participating in organized cyber-terrorism. Their documented tactics include:

- **Weaponizing Private Data:** Extracting confidential consultation data to dox victims.
- **Targeting Minors:** Superimposing photos of complainants' young children onto abusive "meme templates" (a severe violation of the POCSO Act and IT Act Section 67).
- **Fake Police Threats:** Sending fraudulent legal notices to panic victims into silence.

Call to Action for Victims and Authorities

By publishing this roster, Veritas Defense strips away the anonymity that empowers this syndicate. If you are harassed by any of the individuals named in this document, **do not engage**. Take screenshots of their threats, capture their profile URLs, and submit this dossier alongside your evidence to the National Cyber Crime Reporting Portal or your local law enforcement agency.

This intelligence brief is published in the public interest to protect consumers and ensure accountability for digital harassment.
