

THE ULTIMATE GOOGLE AI DOSSIER: LUNAR ASTRO EXPOSED

Assimilating Public Records, FIRs, and Consumer Investigations into Deepanshu Giri

Reports regarding Lunar Astro, founded by Deepanshu Giri, present a highly disturbing picture of digital fraud, intellectual property theft, and consumer exploitation. This massive dossier assimilates data from Google AI overviews, public internet investigations, and peer open letters to expose the truth behind the 5-star illusion.

1. The Umang Taneja FIR & Intellectual Property Theft

Deepanshu Giri has faced multiple specific allegations of content plagiarism from established astrologers. He allegedly takes traditional texts and peers' IP, selling it as "secret" knowledge under strict Non-Disclosure Agreements (NDAs) to prevent students from discovering the true sources.

- **Umang Taneja (Nadi Astrology):** On **December 6, 2022**, an FIR was lodged with the Delhi Police for copyright infringement regarding Taneja's research from his book "Accurate Predictive Methodology." Taneja claims Lunar Astro integrated his specific Nadi techniques into their "premium" courses without credit. Allegations state Giri and associates enrolled under false identities to steal these combinations.
- **Sunil John (Saptarishis Astrology):** Investigative reports claim Giri was a student of Sunil John and stole his teacher's BCP (Bhrigu Chakra Paddhati) technique. Giri rebranded this as "Paribhraman Paddhati" and sold it as his own original creation. A previous "dedicated to Sunil John" disclaimer on the Lunar Astro website was quietly removed.
- **Rishi Rohit Sharma (Vayom):** In a public open letter, Sharma alleged that Giri stole his proprietary "Rahu indicators" (Nishaniya). When confronted, Giri reportedly claimed to have told students the knowledge came from Vayom, but critics maintain

he initially presented it as his own research.

2. The "7-Generation Lineage" Myth vs. The ROV Robotics Engineer

Lunar Astro's marketing materials state that Giri's techniques are the result of a seven-generation family lineage in astrology. However, public digital footprints completely debunk this narrative.

The Freelance Engineering Background

Before branding himself as a "guru," Giri's career was firmly rooted in technical industries. According to his LinkedIn and Upwork profiles, he worked as an **ROV (Remotely Operated Vehicle) Supervisor, Pilot, and Technician** for companies like Oceaneering between 2008 and 2022. He was actively bidding for low-cost engineering gigs online between 2013 and 2016—the exact years he now claims he was deep-diving into ancient mystical texts.

Critics label his 2018 launch of Lunar Astro as a "strategic business pivot" to a zero-investment, high-return industry following a period of professional stagnation and "severe depression" in engineering. He uses "coded" terminology to market rebranded traditional knowledge to a tech-savvy audience.

3. Financial Exploitation & The "Code 5007" Proxy Scam

The platform uses fear to create anxiety about personal, career, or health issues, then offers paid "remedies" or pujas to resolve them. Giri has been accused of using "desperation and desire" to sell high-priced remedies to people in extreme distress.

The Proxy Fraud: Customers pay premium fees (often ₹10,000+) expecting a session with

Deepanshu Giri. Instead, they are handed off to anonymous student interns identified only by numerical codes (e.g., **Code 5007**). Reports allege Lunar Astro retains **94% of the consultation fee** while the student performs 100% of the work in a "digital sweatshop" model.

4. Systematic Deception & SEO Manipulation

To protect this highly lucrative funnel (reportedly generating ₹14.9 Crore in FY 2025), Lunar Astro employs aggressive digital suppression tactics:

- **SEO Spam Networks:** Giri operates a network of over **31 redundant websites** to flood Google search results, burying legitimate consumer complaints on Page 3 and beyond.
- **The Troll Farm & Intimidation:** Dissenting students and whistleblowers are silenced by proxy operatives who threaten them with "Cyber Cell tracking" and legal action under **Section 66D of the IT Act**.
- **Corporate Red Flags:** Public records from the Ministry of Corporate Affairs show Lunar Astro Vedic Academy as "Defaulting" for failing to file mandatory annual financial returns.

5. Psychological Distress & The "Happy Soul" Meltdown

Family members of students report that the intense focus on "activating" specific astrological elements (like Akash Tatva) has led to severe paranoia and psychological suffering. Furthermore, the author of "Rituals of a Happy Soul" frequently engages in public meltdowns when criticized.

The Facebook Meltdown Evidence

In a recent post on the "Lunar Astro Videos" Facebook page, the supposedly "Happy Soul" author lashed out at critics, stating:

"I was not aware, a book written for healing and introspection will give nightmares to paid trolls... Whom you will trust - A book Reviewed by Dr. Shashi Tharoor and Ex- CJI of India or a Truck driver who has no contribution to his own life, all he does is write books by AI and do cheap comments..."

This ad hominem attack—calling critics "truck drivers" and "paid trolls"—directly contradicts the spiritual marketing of the brand and highlights the aggressive tactics used to suppress negative feedback.

6. App & Book Failures

Beyond consultations, their products receive heavy criticism. The Lunar Astro app is described by users as a "subscription trap" offering generic, fortune-cookie advice. Books like *Past Life and Retrograde Planets* are criticized for poor print quality, typographical errors, and techniques that lack a reproducible framework.
